HYYP

🔴 **ALERT**   🟢 **HOME**   🔵 **CORPORATE**

Have an alarm system in place? Are you:

- Able to receive event notifications, disarm, and rearm your alarm panel remotely?

- Immediately notified when your alarm is activated?

- Informed who is arming and disarming your alarm panel or bypassing any zones?

- Able to contact your monitoring company without having their number?

Remote control and monitoring anytime, anywhere, in real time

THE HYYP SOLUTION: Changing the way we interact with our home, business and monitoring devices

Imagine being able to control your home alarm system while away on holiday or check on the security system at work from the comfort of home? HYYP means you can do just that. All you need is an Android Smartphone, the HYYP Hub and the IDS X-Series alarm panel. You pay a monthly fee and HYYP and your monitoring company take care of your monitoring needs. Simple as that.

How does **HYYP** work?

Harnessing cutting-edge GPRS technology, HYYP is a global monitoring solution providing:

🟢 Real time alarm panel control

🔴 Reports of alarm events to your monitoring company

🟣 Soon-to-be available home automation features

HYYP

HYYP

The App means control is at your fingertips

- Secure multi-site management from your smartphone – no need to go to the site!
- Full arm, stay arm, and disarm abilities as set up by the installer
- Zone Bypass function to handle problematic zones when you're out of reach
- User Management, including zone and partition naming, as well as the ability to set, edit, suspend, or delete user access rights
- Real-time notifications – know what's happening as it happens!
- "Make a Call" function for contacting your monitoring company or critical contacts in the event of emergencies or false alarm activations

Reliable, technology-focused, and user-friendly

Change the way you monitor your devices

Keep your home and business safe
